### CURATION NOTES

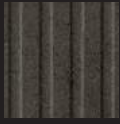

The FS Loft name derives from a historic collaboration with a Spanish well known architect Francisco Segarra. The visual appeal of brick and all the benefits of ceramic tiles are what FS LOFT seeks to combine in this design for wall applications. Features an irregular, rough-cast appearance combined with a silky, easy-to-clean surface, there are very few available options in this look. Made in Spain a white-body wall tile that unites beauty with functionality. Deep Tech technology was used to give the relief pattern to give it depth. Add some character to your next wall tile project With FS Loft Collection.
